

## **SCOPE OF WORK – CENTERED CONFERENCE TABLE (WITH BUILT-IN EQUIPMENT STACKER)**

---

### **(1) BACKGROUND/STATEMENT OF NEED**

Information Systems Center (IRM) has been experiencing overwhelm amount of request for setting-up OpenNet Workstations (temporarily) installed in ISC/GPF Building Conference room every time there are computer or certain application requirement such as computer-based training or test, workshop or even interactive meetings which are conducted by participants mission-wide. ISC is looking for solution to reduce workload and man power to assemble and dismantle OpenNet Workstation every single time as ISC normally done these days, and it still has not to impair conference room atmosphere aesthetically.

### **(2) OBJECTIVE(S)**

The purpose of centered conference room table armed with built-in computer stack, along with hidden flipping monitor tray is solution of how ISC is able to permanently install a number of computer and monitor, as well as cord/cable, and yet still enhance professional look for the conference room. This not only helps the section save tremendous amount of time install/un-install computer all the time, but also increased flexibility and options in terms of space utilization mission-wide.
